

Galaxy-by-galaxy SPARC fits + stacked weak-lensing comparison vs DES Y3 / KiDS-1000 / HSC-Y3

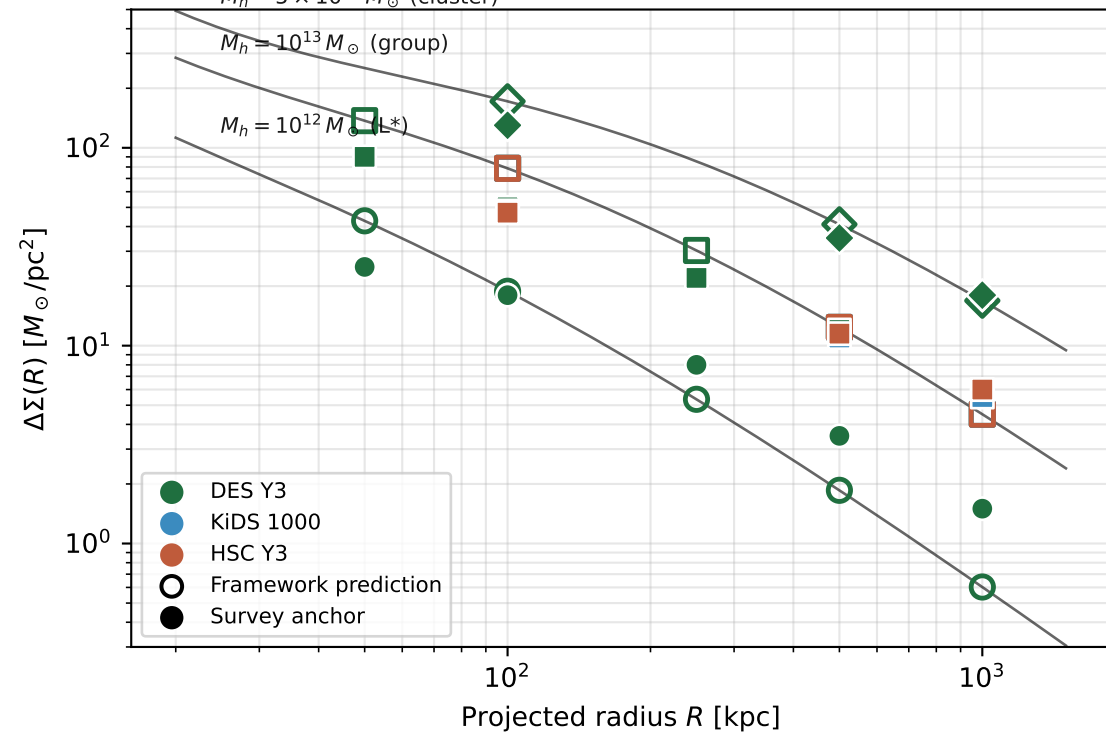

A. SPARC galaxy-by-galaxy fit quality (15 galaxies, dwarf to massive)

B. NGC 3198 rotation curve ($v_{\text{flat}}=149$ km/s)

C. Stacked weak-lensing $\Delta\Sigma(R)$: framework vs DES/KIDS/HSC

D. Residual distributions: SPARC + lensing
